

Ready.Set.Recycle.

Our bespoke Client Portal

We understand the importance of ensuring complete transparency and traceability when dealing with the disposal of unclaimed electronic lost property, to meet both internal and external audit obligations.

That's why we created a bespoke Client Portal with secure log-in, API integration with in-house systems and 24/7 access.

The portal holds the individual credentials of ALL devices received and processed on your behalf, captured on itemised audit reports and data erasure certificates, all of which can be customised to suit your needs.

Ready Set Recycle ensures full compliance with current EU and UK data privacy regulations with comprehensive reports detailing:

- Manufacturer ID
- Model Name
- IMEI/Serial Number
- Device Lock Status
- Legal Status
- Erasure Method, Duration & Outcome
- Time & Date of Erasure
- Physical Condition

In today's governance, risk and compliance climate it is imperative for ALL custodians of electronic lost and found property, to ensure the safe and reliable disposal of personal data and PII (Personally Identifiable Information).

NIST

ADISA

- **ADISA certified, GDPR compliant and NIST approved erasure software.**
- **CCTV throughout the end-to-end process.**
- **CheckMEND due diligence checking.**
- **ISO 14001 accredited, environmentally responsible recycling, eliminating e-waste using a highly certified WEEE waste partner.**
